

Abudullah BB

Full-Stack Developer

abudullahbb38@gmail.com | github.com/abudullahbb38/

PROFESSIONAL SUMMARY

Full-Stack Developer (MERN stack) with hands-on experience building and deploying production web applications using React, Next.js, Node.js, Express.js, Python(FastAPI), and databases including MongoDB, PostgreSQL, and SQLite. Skilled in REST API integration, JWT authentication, responsive UI development, and end-to-end deployment on Vercel and Render. Strong foundation in component-based architecture, Git version control, and Agile collaboration with cross-functional teams. Comfortable working across the full stack, from frontend UI to backend API and database design.

TECHNICAL SKILLS

- **Languages:** JavaScript (ES6+), Python, HTML5, CSS3
- **Frameworks & Libraries:** React.js, Next.js, Node.js, Express.js, FastAPI, Tailwind CSS, Django
- **Databases:** MongoDB, PostgreSQL, SQLite
- **Tools & Platforms:** Git, GitHub, REST APIs, JWT Authentication, Vercel, Render, Postman, VS Code
- **Core Concepts:** Responsive Web Design, API Integration, Component-Based Architecture, Agile/Scrum, Cross-Browser Compatibility, Version Control, CI/CD (basic)

EXPERIENCE

Frontend Developer — Colibrisoft

July, 2021 - Apr, 2023

- Built and deployed 10+ client-facing web applications, developing 50+ reusable React components using Tailwind CSS for responsive, cross-browser-compatible interfaces.

Full-stack Developer — Udevs

May, 2023 -

- Shipped multiple full-stack features end-to-end, integrating REST APIs and partnering with backend and design teams across several sprints to ship functional UI features on schedule and reduce UI-related bugs.
- Wrote maintainable, component-based, reusable code adopted across multiple projects, cutting future development time on similar features and quickly ramping up on new tools in a fast-paced Agile environment.

PROJECTS

Payme — React, FastAPI, Python

- Worked on the development of a high-load web application for Payme.uz, an online payment platform in Uzbekistan, contributing to project planning, software development, testing, implementation, and ongoing maintenance.
- Contributed to delivering and improving web-based functionality while focusing on application quality, user engagement, SEO optimization, and reliable implementation of the developed solution.

Collaborated throughout the development lifecycle to deliver the project on time and within budget, supporting Payme.uz in providing a stable and user-friendly digital payment experience for its customers.

Clutch — Next.js, Express, Node.js

- Developed and maintained a professional B2B service marketplace website, Clutch.co, designed to help businesses discover, evaluate, and compare software development companies, IT service providers, and other professional agencies.
- Implemented user-focused features for browsing company profiles, reviewing client feedback, comparing service providers, and accessing detailed information about companies based on their expertise, location, industry, and project experience.
- Contributed to building a scalable and responsive web platform that organizes large amounts of company and review data while providing an intuitive search for businesses looking for reliable technology and professional service partners.

Qwatt - JavaScript, Node.js, REST API

- Helped organize company profiles, service categories, client reviews, and project information to improve transparency and simplify the vendor-selection process.

EDUCATION

BSc in software Engineering — Tashkent University of Information Technologies

Sup, 2015 – June, 2019

MSc in software Engineering — Tashkent University of Information Technologies

Sup, 2019 – June, 2021

LANGUAGES

- English: Advanced(C1) Japanese: Intermediate(B2)
